DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 3-13 in the reply filed on 09/27/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Further restriction is required as follows:
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 3-8, drawn to a bonding stage that packages an electronic component, classified in class 156, subclass 379.6.
 - II. Claims 9-13, drawn to a packaging apparatus, classified in class 156, subclass 381.
4. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the plasma electrode included in the placement member of the bonding stage disclosed in the subcombination can be placed outside said placement member. The subcombination has separate utility such as a plasma deposition stage.
